

Dere i Dyfu activity sheet !

Design your own plant pot and grow your own flowers!

You'll need:

- Biodegradable plant pots (can be bought in garden stores)
- Multipurpose soil (ask a parent or guardian)
- Acrylic paint
- Paint brushes
- Water
- Summer flowering flower seeds (ask a parent or guardian)

1. First, lay down some old newspaper and get your paint, paintbrushes, a cup of water, and your pots ready on a table.
2. Start painting your plant pot with funky designs and colours – the brighter the better!
3. Leave your pots to dry for around 2 hours.
4. Fill your decorated plant pots $\frac{3}{4}$ full with soil.
5. Add your flower seeds and then cover with more soil.
6. Gently water your seeds (less is more).
7. Place your plant pots in a sunny spot – like a window sill or outside.
8. Water your seeds every other day (or daily, if in direct sunlight)
9. Have fun watching your flowers grow over the summer.
10. Re-use your plant pots again and again.
